

Welcome to Middlesex University!

My name is Iveta Todorova and I am running for Vice President of Health, Social Care, and Education because I believe students should have a central voice in their education.

We all have made large sacrifices and worked hard to get here. I strongly believe that our Student Union has a duty to support societies and student services. However, I feel the Union has failed in this regard. Societies are an important part of the university experience and they make a great contribution to student life. Our union should be petitioning for more funding for our society.

If I am elected, I will make sure that future health, social care, and education professionals have a strong social platform and society where they can socialise and share expertise.

As a social work student, I am well aware that in our line of work, having an increased social platform will have a great impact on our careers as we will all work in multidisciplinary teams and relationship building is crucial.

One of my main morals is to help people and my top priority is to advocate for them. I will fight for you and use everything within my power and beyond to make sure all your concerns are addressed and resolved.

Please feel free to email me if you have any questions or you just want to have a chat. I am here to help.
